I enjoy your workshops because they are interactive and very informative. I have use many of the strategies I've learned in my classroom. Brain loves novelty so I try to be "weird" in my lessons.

Thank you for being the best part of my MM & GO workshop!

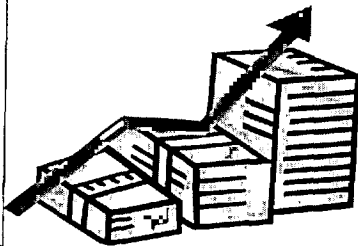

I hope that our paths cross again!
With many thanks,

The only downfall to this course is not having enough time to enjoy the subject matter more! Wonderful class and learned a ton of information in such a short amount of time. I've learned more from this class than I have from most college courses. The techniques shared can definitely relate to real life circumstances, $\frac{1}{3}$ implemented into my daily routine. It was truly a pleasure to be a part of this class, and a wonderful opportunity to have a professor as great and excited about the subject as you.

Thank you
