I have learned so much in Dr. T's Class. It is amazing how you teach. I am able to honestly say that I have learned the most in this class than any other class in my entire life. Your class motivated me to inform others of what I had learned. I would eagerly go home and read off things to my husband with the colored forms. You are amazing and I am blessed and honored to have had you as a teacher. I thank you for all of the teaching advice, and I look forward in teaching children, like you have taught me! 😊

I felt freer to learn without worrying about what was going to be on a test.

Hearing all the different presentations was a fun way to learn.

Sometimes a "simple" project took a lot more time to finalize.

Constant movement + various activities kept me engaged in class.

This course was a very eye opening experience  
I was taught not only to view things in a different way  
but how to pass ~~them~~ those things along to my future  
students. I learned an enormous amount of what makes  
people tick, & respond & how to do it in a fun &  
positive way. I have never had such an enjoyable  
class & instructor. Thank you so much.

I really enjoyed this class & we always had such a fun time. The pencils were a very clever idea and got everyone to participate. I have been using the same method with my children. It is so interesting to learn about all the places you have been & what you know. Not once did I ever dread coming to this class. Thank you so much for all you have taught us!!

Dr. Torbati:

Your class has been my favorite so far and by far. Your passion is infectious. Your teaching style suited me so well that I did not feel stressed at all, and I felt like I learned more than usual. Not only was each and every class engaging, but also inspiring and informative. I know I will use so much of what you taught me in my own career. You've blessed us all so much. I pray I become half the teacher you are now. May the Lord bless and keep you and your husband.

Sincerely,

The material we covered in this class was varied and interesting. I was especially interested in all of the neurological connections you made.

Thank you.
