

Please evaluate your brain base learning/classroom management

workshop!

This was a stimulating and practical workshop!! I hope to implement many of these concepts and strategies immediately. The afternoon (after the posters) was a little too rushed and chaotic — I felt the need to slow down and reflect a bit more.

You are a great presenter —
Very knowledgeable and enthusiastic
— THANK YOU!

“Any fool can know. The point is to understand.”

— Albert Einstein

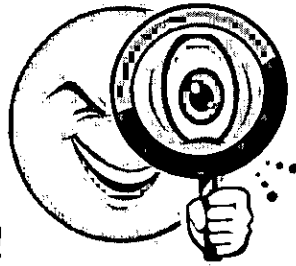

“We are each gifted in a unique and important way. It is our privilege and our adventure to discover our own special light. No two brains work the same way

Mary Dunbar -

I've learned that people will forget what you said, people will forget what you did, but people will never forget how you made them feel.

Maya Angelou

Please evaluate your brain base learning/classroom management

workshop!

There were a number of interesting and pertinent points in this workshop. However, I would have preferred a slower pace. ~~If there was a sheet~~ For each sheet passed out, I would have preferred to have spent ~~a bit~~ at least a little time on each (e.g. the color copy of the brain). I thought that the instructions for the poster were lacking. At one point, we received a procedure for testing for color of the brain - how does this translate to a poster?

"We are each gifted in a unique and important way. It is our privilege and our adventure to discover our own special light. No two brains work the same way

Mary Dunbar -

I've learned that people will forget what you said, people will forget what you did, but people will never forget how you made them feel.

Maya Angelou

Please evaluate your brain base learning/classroom management

workshop!

Today's workshop is very informative.
I go home with tons and loads of information.
Thank you for sharing your wisdom, time
and self — and many tangible rewards!

Bless you!

Maya Angelou

Please evaluate your brain-base learning/classroom management

workshop!

- Excellent. Loved all the activities & videos
- learned a lot about the brain & what I need to change about my teaching
- would like more small breaks

"Any fool can know. The point is to understand."

I've learned that people will forget what you said, people will forget what you did, but people will never forget how you made them feel.

Maya Angelou

Please evaluate your brain base learning/classroom management

workshop!

The workshop was very worthwhile. Some of the information was a good review and much of the information was new. It will definitely be helpful to apply what we learned to our classroom & especially enjoyed learning about the role of emotion and how to improve memory. Thanks for the workshop.

workshop!

This was interesting and engaging.
It felt a little rushed at times.
Some of the reading was too long
for the time given.

Really enjoyed today's workshop.
I teach first grade and I am all
about colors. I love the different
colors; foam note pads, and rewards.
Great!

workshop!

Great reflection and ideas to use and continue to use in my classroom.

Liked color, motivation, working with others.

Would have liked - to have time to just sit and enjoy my lunch. Not to be a "working" lunch but rather be able to just "come down" for a few minutes.

"Any fool can know. The point is to understand."

- GOOD WORKSHOP BUT ϕ breaks. Hard to process all the info. Might be better to have 2 half days.
- Lots of enthusiasm & information
 - Really liked the foam

"Brain based learning" was informative
- different ways brain functions, takes in information
- how to boost memory:
-

need engaging curriculum

" movement

teach vulnerability.

"Any fool can know. The point is to understand."

Thank you! So much information -

I enjoyed the variety of modes of learning.

I am thankful for your YouTube references to help me remember later. I have written on one of my foam sheets a list of action items I am excited to implement. I was reinforced to hear some of ~~you~~ the strategies for engaging students are things I do in class already - good to hear I'm starting somewhere vs nowhere.

I learned so much that I am glad I took many notes. I look forward to implementing them in the classroom. She presented in an engaging way + practiced what she was teaching & it was very effective. I believe we are entering a new era as teachers and learning is so important for us & our students from the newest research. Loved it!

This was great! I am in a credential program and learned a lot of similar material from Anneli Jensen at NDVA.

It was useful to hear it again, in a different format, with a different teacher to reinforce the importance of brain based learning.

workshop!

I learned a lot! It was helpful to learn about child development and practical teaching skills. The many rewards handed out were great too. My only drawback is not having much clarity for the activities and everything moving too fast. More time with less activities would be great.
