

Please evaluate your "Brain Base Learning"

The information is excellent and the way it was presented allows for us as students and teachers to experience first hand, the effectiveness of multi-modality teaching! It all makes so much sense and goes along with everything that we learn in child development classes. Brain based learning, if truly embraced and demonstrated in our schools, could not only improve our children's learning but also improve their mental & physical health. I have learned much from your workshops and return to work inspired and hopeful that I can be a positive facilitator in my students' journey in learning!

Thank you for attending and creating the best brain based learning environment

Remember "when you put the brain first & how it learns at the top, success is inevitable"

I'm so excited about what I've learned today. Some information was information our program currently uses to serve our families and students and there was also a wealth of new information that I plan to use and share w/ other teachers.

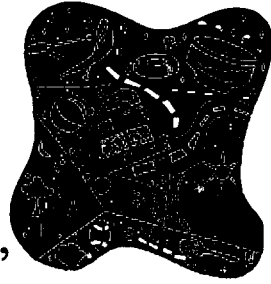

Thank you for today's activities and learning. 😊

Excellent workshop!! 😊

Pleasure to meet you and participate in your workshop!

Please evaluate your "Brain Base Learning"

This brain based learning class has been
informative and game changing.
Thank you for motivating me to
become a better mother and teacher.

You are wonderful !!
😊

I enjoyed this course. A lot of information, and
I am glad we are getting copies of all handouts.
I will encourage colleagues to take this course!
