Our instructor, Mayam Torabi, presented the ideas in an affective learning environment. She allowed all to participate and share our ideas on our topic of stress—living with stress. The email ahead of time with handouts / worksheets was much appreciated and allowed us to read through and prepare for our class.

I especially enjoyed the team work and idea sharing which promoted a different / new perspective for looking at ways of handling stress; as well as the information ~~that~~ I learned about the affect of stress on the brain, body, overall health which affects the quality of one's life.

Excellent—lots of variety video/DVD, music, physical activity, teamwork participation. Love it!
